

SARDHARA BRIJESH DILIPBHAI

Information Technology Engineer | Data Science & Machine Learning Enthusiast

Phone: +91 9023967737 | Email: sardharabrijesh9@gmail.com | Location: Ahmedabad, Gujarat, India

Linkedin: <https://www.linkedin.com/feed/>

PROFESSIONAL SUMMARY

Motivated Information Technology undergraduate at Gandhinagar University with a strong foundation in Python, SQL, Machine Learning, and Deep Learning. Experienced in building end-to-end ML and DL projects including predictive models and NLP-based classification systems. Currently pursuing a Data Science course with hands-on expertise in data analysis, data visualization, and model development. Eager to apply technical and analytical skills in a data-driven engineering role.

EDUCATION

Bachelor of Engineering – Information Technology

Gandhinagar University, Ahmedabad, Gujarat

Currently Pursuing | Semester 5 CGPA: 8.68 / 10.0

TECHNICAL SKILLS

Programming Languages: Python, SQL

Machine Learning: Supervised Learning, Regression, Classification, Clustering, Model Evaluation

Deep Learning: Neural Networks, NLP, Text Classification, Model Training & Optimization

Python Libraries: Pandas, NumPy, Scikit-learn, TensorFlow / Keras, NLTK, Matplotlib, Seaborn

Data Visualization: Power BI, Matplotlib, Seaborn

Data Analysis: Data Preprocessing, Feature Engineering, EDA, Data Cleaning

Tools & Technologies: Jupyter Notebook, VS Code, Git

SOFT SKILLS

Interpersonal: Communication, Leadership, Team Collaboration, Problem Solving

PROJECTS

House Price Prediction System | Python | Machine Learning | Scikit-learn | Pandas | NumPy

- Built a supervised machine learning model to predict residential house prices based on key property features such as area, number of rooms, location, and amenities.
- Performed end-to-end data preprocessing including handling missing values, feature encoding, and normalization to improve model accuracy.
- Trained and evaluated multiple regression algorithms (Linear Regression, Random Forest Regressor) and selected the best-performing model based on RMSE and R^2 score.
- Conducted Exploratory Data Analysis (EDA) using Pandas, Matplotlib, and Seaborn to identify key features influencing property prices.
- Applied feature engineering techniques to improve predictive performance and reduce overfitting.

Fake News Prediction System | Python | Deep Learning | NLP | TensorFlow / Keras | NLTK

- Developed a Deep Learning-based Natural Language Processing (NLP) model to classify news articles as real or fake with high accuracy.
- Implemented text preprocessing pipeline including tokenization, stopwords removal, stemming, and TF-IDF / word embedding vectorization using NLTK.
- Designed and trained a neural network model using TensorFlow/Keras optimized for binary text classification tasks.
- Evaluated model performance using accuracy, precision, recall, and F1-score metrics to ensure reliable fake news detection.
- Applied deep learning techniques to handle large-scale text data and improve generalization across diverse news sources.

ATM Simulation System | Python | OOP

- Developed a fully functional ATM simulation application using Python to mimic real-world banking operations.
- Implemented features including account authentication, balance inquiry, cash withdrawal, deposit, and transaction history.

- Applied object-oriented programming (OOP) principles to design modular and reusable code architecture.
- Incorporated input validation and error handling to ensure a robust and user-friendly experience.

COURSES & TRAINING

Data Science with Machine Learning & Data Visualization (Currently Pursuing)

- Developing practical skills in Python, Pandas, NumPy, and data preprocessing techniques.
- Applying machine learning algorithms including regression, classification, and clustering through real-world projects.
- Gaining hands-on experience in data visualization and storytelling using Matplotlib, Seaborn, and Power BI.
- Continuously exploring new tools and techniques to strengthen analytical and problem-solving abilities.

CERTIFICATIONS

Data Visualisation: Empowering Business with Effective Insights

Platform: Power BI | Focus: Business Intelligence, Data Storytelling, Dashboard Design

CORE COMPETENCIES

Analytical Thinking | Problem Solving | Quick Learner | Attention to Detail | Team Collaboration | Time Management

LANGUAGES

Gujarati (Native) | Hindi (Fluent) | English (Professional Working Proficiency)
